TAG OPS R SERIES

Bench or Stand Mountable Orbital Pipe Saw

Range: 1/4" to 12" (6mm- 300 mm o/d)

- **Functions:** Straight cutting of Pipes
External Beveling
- **Materials:** Any kind of steel and Exotic Alloy
- **Power:** Electric.(110v or 220v)

TAG bench orbital pipe saws are the low-cost and practical solution to cut and bevel almost all types of metal pipe. Cutting is executed by manually rotating the machine around the pipe. The pipe is cut with one single rotation. It is powered by a powerful and sturdy electric motor equipped with speed regulator. The pipe saws produce a square, burr-free cut that does not require any further dressing.

Features & Advantages

A cam system engages the blade into the cutting position upon initial rotation. The blade is then effortlessly rotated around the pipe, either manually by the operator, or Automatically at the push of a button with the optional rotation motor (available for the OPS R8 & R12) making the cutting of larger diameter pipes a more productive, less labour intensive process.

The Prismic locking Jaw system ensures 100% square clamping of the pipe, to ensure a 100% square cut. The Prism jaws are available for working with exotic materials, such as stainless steel, where potential contamination issues from dissimilar materials is unacceptable. The pipe is secure clamped by the rotation of a square drive, with the removeable handle provided.

TAG OPS Lite Range

The OPSR 4 is available as a 'Lite' model, suited to regular lighter duty work(see spec)
Much lighter in weight than their HD equivalents, they are easier to move from job to job.
These are highly popular in the hygiene, water and food industries, where thin wall pipes & tubes are most common.
